

COHORT 3 · MID-PROGRAM UPDATE

Curriculum delivered. Capstone underway.

Foundation, the full Dev specialization track, and every BA + QA shared block — opener, spec stack, diagrams, and quality & compliance — are all complete. The cohort has now moved into the Capstone phase: four real-product builds, eight parallel teams, all in flight.

AT A GLANCE

FOUNDATION

12 / 12 classes

DEV SPECIALIZATION

18 / 18 classes

BA + QA SHARED

23 / 23 classes

CAPSTONE PROJECTS

4 · 8 teams

PHASE 01 · PHASE 02 — WHAT'S BEEN COMPLETED

What's been completed

All 42 trainees finished the shared Foundation phase together. From there the Dev cohort completed its full eighteen-class frontend specialization, while BA and QA trainees worked through every shared block — the combined opener, the spec stack, the diagrams series, and the quality & compliance block.

Foundation COMPLETE

All 42 trainees together — shared knowledge base before verticals split.

Progress · 12 / 12 · 100%

- | | |
|---|--|
| 01 ✓ Welcome & Orientation | 02 ✓ Professional Skills |
| 03 ✓ AI Basics & Prompting | 04 ✓ How the Internet Works |
| 05 ✓ APIs, Data & Databases | 06a ✓ Dev Tools & Version Control |
| 06b ✓ HTML & CSS Basics | 07 ✓ SDLC, Agile & the AI Era |
| 08 ✓ Teams: Traditional vs AI-Era | 09 ✓ Spec-Driven Product Thinking |
| 10 ✓ Build Personal Site & Present | 11 ✓ Vertical Assignment |

Software Development COMPLETE

Frontend-focused track — JavaScript, TypeScript, React, and AI-assisted workflows.

Progress · 18 / 18 · 100%

- | | |
|--|---------------------------------------|
| 01 ✓ Dev Environment Deep Dive | 02 ✓ JavaScript Fundamentals I |
| 03 ✓ JavaScript Fundamentals II | 03b ✓ JavaScript Practice Day |
| 04 ✓ DOM, Browser APIs & Async | 05 ✓ TypeScript Foundations |
| 06 ✓ Intro to React | 07 ✓ React Hooks |

- 08 ✓ React Patterns
- 10 ✓ Working with APIs
- 12 ✓ Styling in React
- 14 ✓ AI-Assisted Development
- 16 ✓ Mini Project Week

- 09 ✓ Routing & Navigation
- 11 ✓ Forms & Validation
- 13 ✓ Build & Deployment
- 15 ✓ Working with a Backend
- 17 ✓ Code Review & Shipping

BA + QA · Foundations COMPLETE

Role clarity, spec-reading, FR vs NFR, acceptance criteria, estimation.

Progress · 5 / 5 · 100%

- 01 ✓ Role Deep-Dive
- 02 ✓ Reading Requirements
- 03 ✓ FR vs NFR
- 04 ✓ Acceptance Criteria
- 05 ✓ Estimation & Prioritization

BA + QA · Spec Stack COMPLETE

The artifact stack BAs and QAs work with daily — anatomy, BRD, SRS, HLD/LLD, writing mechanics, teardown.

Progress · 6 / 6 · 100%

- 01 ✓ Anatomy of a Dev-Ready Spec
- 02 ✓ The BRD Document
- 03 ✓ The SRS Document
- 04 ✓ HLD & LLD Workshop
- 05 ✓ Writing Mechanics for Specs
- 06 ✓ Spec Teardown Workshop

BA + QA · Diagrams COMPLETE

The seven diagrams every software professional should read fluently — one session per type.

Progress · 7 / 7 · 100%

- 01 ✓ Use Case Diagrams
- 02 ✓ BPMN
- 03 ✓ Flowcharts
- 04 ✓ Swimlane Diagrams
- 05 ✓ UML Activity Diagrams
- 06 ✓ Data Flow Diagrams
- 07 ✓ Sequence Diagrams

BA + QA · Quality & Compliance COMPLETE

Testing fundamentals, bug reporting, risk, data protection, security & observability.

Progress · 5 / 5 · 100%

- 01 ✓ Software Testing Fundamentals
- 02 ✓ Bug Reporting & Defect Lifecycle
- 03 ✓ Risk Management
- 04 ✓ Data Protection & Compliance
- 05 ✓ Security, Observability & Telemetry

PHASE 03 · CAPSTONE — WHAT WE'RE WORKING ON NOW

What we're working on now

4

REAL PROJECTS

Every trainee is now on a Capstone team. Four product ideas, two parallel groups per idea, eight teams in total. Each team has a Dev Lead, a second Dev, BAs and a QA — a small, self-sufficient unit shipping a working web product by Demo Day.

PROJECT · 01 2 TEAMS

GMC Service Directory

Essential Services Registry for Gelephu Mindfulness City

A searchable, categorized directory of essential services across GMC — every service with its own informational page so residents and newcomers can find what they need without guesswork. Built as a public-facing reference: clear categories, fast lookup, authoritative service detail pages.

Inspired by a project idea carried over from a previous Pelsung cohort, now picked up and built out by Cohort 3.

PROJECT · 02 2 TEAMS

Pelsung Project Catalog

A one-stop directory of Pelsung project ideas

A single home for every Pelsung project idea, with the flexibility to link out to external documentation or host docs directly. The catalog is designed to make Pelsung's ideation pipeline visible, browsable, and reusable across cohorts — keeping institutional memory in one place instead of scattered across drives.

STATUS · IN BUILD

PROJECT · 03 2 TEAMS

ZorigHub

An online marketplace for Bhutanese artisans

An e-commerce-style platform that lets Bhutanese artists register their craft and lets buyers browse and purchase products. ZorigHub gives traditional artisans a modern storefront — surfacing local craftsmanship to a national and international audience while keeping registration, listing, and purchase flows simple enough for non-technical sellers.

Inspired by a project idea carried over from a previous Pelsung cohort, now picked up and built out by Cohort 3.

Migsel — GMC Resonance Portal

Citizen-to-city reporting for utilities and public services

A proactive digital response to the daily frustrations of residents — overflowing trash bins, dark streetlights, choked drainage, crumbling roads — that often go ignored. Migsel pairs a live map of waste centers with a simple, direct way to report utility failures, closing the gap between community needs and city action. The aim is to convert reactive maintenance into a data-driven, accountable partnership between residents and GMC services — turning every neighbor into a participant in keeping their streets healthy, safe, and clean.
