EDUCATION

2023 - 2025

JIGME NAMGYEL ENGINEERING COLLEGE

Diploma in Computer System and Network

2021 - 2022

LOSEL GYATSHO ACADEMY

Class 12 Commerce

SKILLS

- Programming Language: Python
- Web Technologies: Laravel framework, HTML, CSS, JavaScript
- Database: MySQL
- Linux Tools and Technologies used: Docker, VS Code, GNS3, Packet Tracer
- Operating Systems: Windows, Linux (Ubuntu and Debian)
- Networking (CCNA Fundamentals)
- Hardware Troubleshooting

LANGUAGES

- Dzongkha
- English
- Sharchop
- Lhotsham

PROFILE

I am a dedicated Diploma student in computer systems and Networks with a strong interest in solving technical challenges. With skills in web development and networking, I am looking for an opportunity to contribute to an IT team and gain valuable industry experience. My goal is to apply my hands-on learning and dedication to deliver tangible results and drive progress on key technical projects.

ACHIVEMENTS

project:

Final Year Project: Docker-based OT/ICS Cyber Range for Threat Detection

Built a Docker-based OT/ICS cyber range using the Purdue Model for safe industrial simulation. Integrated OpenPLC, FUXA SCADA, and Node-RED to replicate realistic control operations. Deployed an EK SIEM stack for real-time monitoring and logging. Executed Kali Linux attacks to evaluate detection within a containerized environment. Demonstrated analysis of reconnaissance and unauthorized Modbus commands. Validated open-source tools for cost-effective OT security training. Established a scalable framework for critical infrastructure defense.

IT ASSET MANAGEMENT SYSTEM (Web Application)

Built a centralized platform to track and manage the lifecycle of hardware and software assets, improving inventory accuracy and resource allocation.

Mini-Project: Setting up an Intrusion Detection System (IDS) in a Docker Environment (Networking)

Developed a Docker-based environment to simulate cyberattacks, including SQL injections and port scans. Evaluated an Intrusion Detection System's (IDS) effectiveness in monitoring and logging threats against a containerized web server.

Course Related Certifications

- Course Completion for CCNAv7: Introduction to Networks, Switching, Routing, and Wireless Essentials, Enterprise Networking, Security, and Automation.
- Certificate of Participation in the Capture the Flag (CTF) Challenge conducted by the GovTech Agency.
- Participating in a virtual Reality application and X3D workshop (22/2024 - 23/2024).
- Training of trainers program on Basic Computer Course (20/2024 - 22/2024).

Participation

- served as a Maintenance Hobby Club member.
- Certificate for having participated in the basketball tournament and secured 2nd place.
- Certificate for having participated in the football tournament and secured 1st.
- Certificate of appreciation for being a college basketball player.
